

Radio Control Association Inc. Since 1962

COME FLY WITH US!
FREE INSTRUCTION
YOU DON'T EVEN
NEED A PLANE!

The Thunderbirds host many events throughout the year. All events are family friendly, well organized and often include pilot lunches for participants. Membership is open to everyone, whatever level of expertise - even if you don't fly, there is always something to do. Join us and make friends that you'll keep for life! Our club members come from all walks of life and bring with them their experiences and talent, but we all have one thing in common - our love for anything that flies, powered or unpowered.

Interested in warbirds? Each year pilots bring a variety of aircraft from WWI through contemporary modern aircraft. We even have aircraft suited for military purposes that have only been conceived in a modeler's mind. Construction methods vary from foam board and medical tape, to riveted aluminum. Power ranges from rubber, nitro, gasoline and electric. Models may be powered by propeller, ducted fans, turbines and rotors. Everyone builds a warbird at some point, let us help you get inspired!

Each year when Daylight Saving Time begins, an intrepid team of instructors begin our summer flight training program. This program is completely free and the club will supply all you need to get into the air - no plane required! The instructors will take you from primary flight instruction all the way to your first solo and beyond. You will learn the skills to be successful and have an advisor to assist you in putting together your first model. If you're interested in planes, drones or helicopters, we have the expertise for success.

The flying field is located in Mustang Park on the south shore of Benbrook Lake: 4300 Winscott Plover Road.
